

THE RIGHT SOLUTION FOR
CLEAN ENVIRONMENT APPLICATIONS

SW SWING DOORS

Strength.

Environmental
Control.

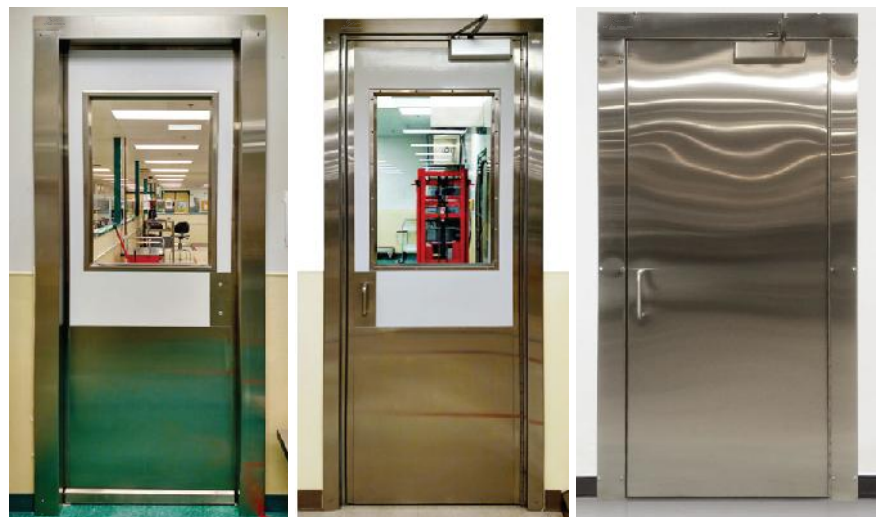

Reliability.

SW Swing Doors are application driven for a wide range of interior and exterior cleanroom, wash down, and/or corrosive environments. This product is designed to add structure with clean design to some of the most demanding food processing, pharmaceutical and ready-to-eat applications.

Clean. Simple. Safe.

Built Steelworks Strong.

SW SWING DOORS

SPECIFICATIONS:

Door Panel: Constructed of 304 or 316 Stainless Steel. Available in Seamless or Lock Seam panel construction. #4 Finish is Standard with optional 2B Finish. 1 3/4" thick Polystyrene Core is standard.

Vision: Panels are available with a wide range of Insulated and Non-Insulated Glass or Lexan Vision Panels. The 4 sided slopped frame eliminates debris depositing on the sill.

Frame: Our unique two piece Sandwiched Casing style frame offers the needed Wall Strength for insulated or stud constructed walls, while creating a clean finished look around the opening. Its two piece construction makes Door Retrofits a breeze. Available in custom widths for all types of wall construction.

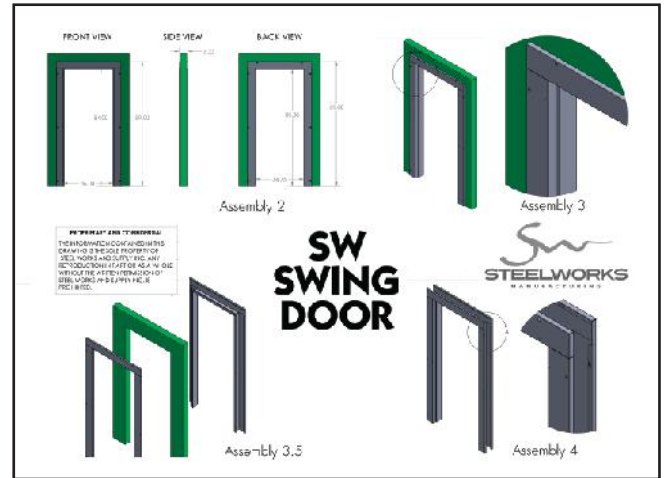

Door Seals: A Full-Perimeter Seal is available on all our products.

Hinging: All SW Swing Doors are supplied with a full height SS Continuous Hinge, it is the last hinge your door will ever need.

Hardware Package:

- #1) Stainless Push/Pull with Stainless Door Closer.
- #2) Stainless Panic with or without Lever Handle for re-entry.

Warranty: One-year Limited Warranty on Materials and Workmanship.

“Since we replaced our doors with the SW Steelworks Swing Doors we have eliminated our sealing and maintenance issues. They are very rugged and clean looking doors.”
